All our Andrex® toilet rolls are manufactured in the UK from FSC certified* and controlled sources. All of our primary packaging material is made using at least 30% post consumer recycled (PCR) material.

Since 2023, our manufacturing facilities in the UK are using almost 80% renewable electricity to make Andrex® toilet tissue.

We are proud to extend the Andrex® legacy even further through our partnership with Bowel Cancer UK - working together to break the stigma around bowel health.
